

3M™ Tegaderm™ Transparent Film Roll

All the benefits of Tegaderm™ Transparent Film Dressings in a non-sterile roll

Tegaderm™ Transparent Film Roll

Simple.
Dependable.
Trusted.

A non-sterile version of Tegaderm™ Transparent Film Dressings

Tegaderm™ Roll provides maximum versatility and is the affordable choice for skin protection and waterproof cover dressings.

- The roll version allows for maximum versatility.
- The perfect solution whenever a waterproof cover dressing is the appropriate choice.

3M™ Tegaderm™ Transparent Film Roll

Unique Features

- Thin film is easily cut to desired shape or size. If needed, corners can be shaped and rounded.
- Conformable – Fits body contours, permits free movement without stress on skin.
- Waterproof, bacterial *and viral** barrier, helps to prevent external contamination of the site, as well as helps to protect the patient and healthcare workers.
- Easy stretch and release removal.

**In vitro* testing shows that the transparent film of Tegaderm™ and Tegaderm™ HP dressings provides a viral barrier from viruses 27 nm in diameter or larger while the dressing remains intact without leakage.

Application Instructions

Step 1

Cut to desired length and round corners or cut to shape for given application.

Step 2

Remove the backliner. Hold dressing by side tabs. Center over dressing or area requiring fixation or protection and apply without stretching.

Step 3

Gently smooth down the dressing, helping to seal the film. Remove the top liner.

Removal Instructions

Step 1

Grasp one edge of the dressing and gently pull straight out to stretch it and release adhesion, carefully holding onto skin with other hand.

Step 2

If necessary, press a small piece of tape onto a corner to start an edge of the dressing. By stretching the dressing, the material expands and releases until the dressing is removed.
